Let us draw a circle using pencil and Bangle.

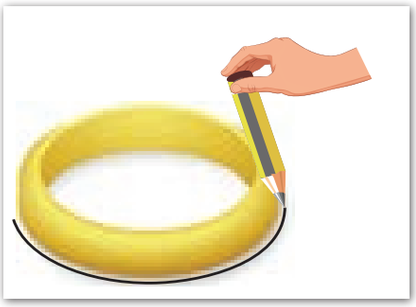

Step 1:

Place a bangle on the paper as shown in figure.

Step 2:

Trace the outline of the bangle with a curved line with the pencil until you reach the starting point, we get a circle.

Properties of a circle

On observing the circle drawn, we shall write the properties of it as follows.

- Circle is a closed curve
- Circle has no sides.
- Circle has no corners.
- Circle has a centre point.

Activity 1

Write the names of few objects in everyday use and mention their geometrical shapes. Example, Paper- Rectangle

Practice

1) Triangle has _____ corners.
2) Four sides of a square are _____.
3) Circle has _____ sides.
4) Rectangle has _____ diagonals.
5) Opposite sides of a rectangle are _____.
6) Circle has _____ centre point.

Teacher's note: Facilitate the children to explore the properties of shapes in various aspects.
