2.5 Estimation

Estimate the sum and difference of the two given numbers by rounding off to nearest 10s and 100s.

Let us round off three numbers 17, 24 and 25 to the nearest 10s.

- We can see that 17 is between 10 and 20 but it is closer to 20 than 10. So, 17 is rounded off to 20.
- 24 is between 20 and 30 but is closer to 20 than 30. So, 24 is rounded off to 20.
- 25 is between 20 and 30. But it is exactly on the middle point. So, 25 is rounded off to 30.

We can easily estimate the sum and difference of any 2 number by rounding off them to nearest values and adding or subtracting them.

Example:

1. Estimate the sum by rounding off to the nearest value and find the actual sum.

Problems	Estimated Answer	Actual Answer
24	20	24
+ 27	+ 30	+ 27
sum	50	51

2. Estimate the difference by rounding off to the nearest value and find the actual difference.

Problems	Estimated Answer	Actual Answer
15	20	15
– 13	– 10	– 13
Difference	10	2
