2.2 Equal Grouping

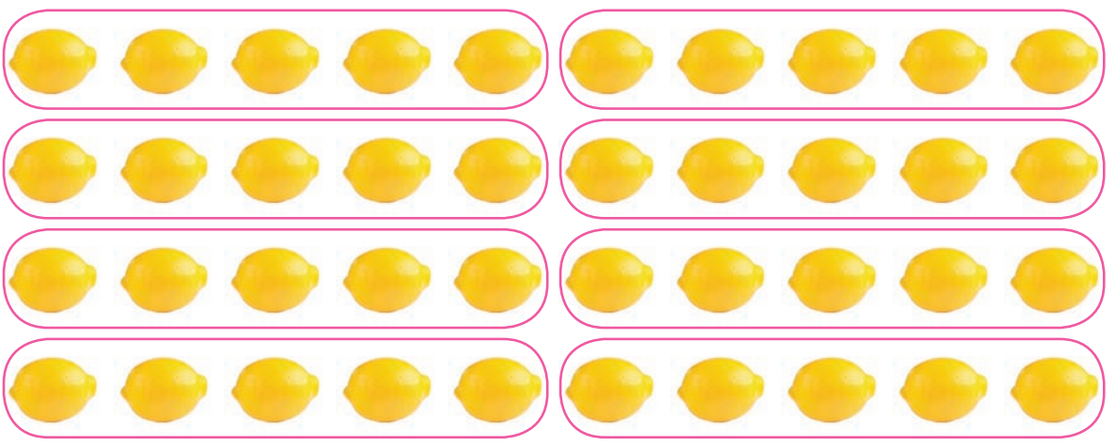

Division can also be done by **Equal grouping**.

This is Rangamma's shop.

She used to arrange the vegetables into equal groups called as *kooru* to sell them.

1. **Rangamma has 40 lemons and arranged 5 lemons in each group. Shall we find the number of groups by grouping the lemons.**

Show this in the given number line.

The number statement can be written as 40 ÷ 5 = 8

2. **Rangamma has 36 coconuts and arranges them into group of 4 each. Find the number of groups.**

The number line can be drawn as

The number statement is _____
