6.2 Chronological Order

Have you noticed your mother preparing idly. How does she prepare it.

- First, she soaks rice and black gram in water.
- Second she grinds then to prepare a batter.
- Third she ferments the batter overnight
- Fourth she boils the batter to make idlies.

These events occur in an order in the process of making idly.

The method of arranging events in the order of their happening is called **chronological order**.

Example of arranging things in chronological order.

Q9X3E3

- Historical event
- Education qualification
- Family tree

1. Write **'F'** for the event which comes first and **'N'** for the event which happens next.

S.No.	Event			
1	Eating		cooking	
2	Boarding into a bus or train		reaching the destination	
3	Drawing a picture		colouring	
4	Taking out a book from the bag		reading	
5	Opening the door		Entering the room
