UNIT-7

# 2 Information Processing

## 7.1 Quick Ways of adding

We perform addition of numbers in many situations daily. Let us learn some tricks which help us to add numbers quickly.

**1. Using addition table is one of the good ways to add small numbers.**

**2. Let us know some facts in addition**

**i. Adding 0 to a number**

A number remains the same when you add 0 to it.

**ii. Adding 1 to a number**

When 1 is added to a number it gives the at number.

**iii. Adding 2 to a number**

When 2 is added to a number the numbers jumps or skips over 2 next to it.

**iv. Adding 10 to a number**

When 10 is added to a number its ones place remains the same and digit in 10 place is increased by 1 i.e., moves to the next number.

**Complete the table**

| + | 0 | 1 | 2 | 10 |
|---|---|---|---|---|
| 1 | 1 | 2 | 3 | 11 |
| 3 | | | | |
| 4 | | | | |
| 9 | | 10 | | |
| 12 | | | | |
| 25 | 25 | | | |
| 73 | | | | |
| 86 | | | 88 | |
| 325 | | | | |
| 791 | | | | |
| 228 | | | | 238 |
| 998 | | 999 | | |
