2. Using Toilets

In the world, nearly one billion people have no access to toilet at all and they are forced to do open defecation. Open defecation spreads diseases such as cholera and diarrhoea. Groundwater is polluted by toilets and it also causes diseases. Children also get affected by intestinal worms which causes anaemia. So, it is necessary to use toilets.

Do you know?

World Toilet Day is observed on November 19.

Why is it important to have a toilet?

Having a toilet

- prevents diseases like cholera.
- offers privacy.
- is convenient.
- is safe.

Effects of open defecation

- Water borne diseases
- Diseases caused by insect carrier
- Pollution

What should we do to wash out the intestinal worms?

We should use toilet and avoid open defecation. We should wash our hands after using the toilet. These will help us to have a healthy life.

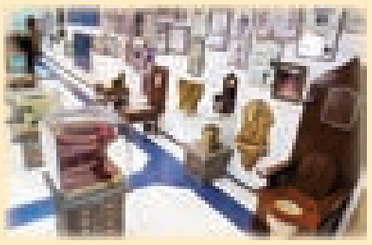

Do you know?

National De-worming Day is observed on February 10.

More to know
