Fuels

- Paper, firewood, dried leaves and charcoal can be burnt.
- Liquids like kerosene, petrol and diesel also burn on heating.
- Domestic gas burns and helps in cooking.

Substances when burnt give out heat. But in some substances, the heat released is very low. Thus, these are not used for heating purpose.

Substances that give out more heat while burning are used for heating purpose. These substances are called **fuels**.

Solid fuels

Coal

Charcoal

Wood

Cow dung

Gaseous fuels

Liquid fuels

Electrical energy is also used as fuel for cooking and transporting.

Match the following.

Liquid Fuel

Gas Fuel

Solid Fuel
