Samudra: What building is this?

Mother: This building is built to extend the market.

Samudra: What is the building built for?

Mother: It is built so as to protect people and traders from sunshine and rainfall.

Samudra: Who built this building?

Mother: A **civil engineer** built it. He gave structure and design to the building.

Samudra: Does a **civil engineer** design a house?

Mother: Yes of course, he designs houses, schools, colleges, bridges, multi storey buildings, temples, settlements, shops, factories, and so on. Buildings are constructed using a plan made by a civil engineer.

Samudra: Oh! I see. Ma...Why are we going through this mud path? This is not our regular route.
