

What to do during a fire accident?

1. Use fire extinguisher.
2. Execute fire warning system in buildings.
3. Cover your mouth and nose with wet cloth when the smoke spreads.
4. Use a sack to put off the fire when it spreads over the body of someone. Bring the person to any airy place.

When your clothes get fire,

- You shouldn't run.
- If you run, the fire will spread rapidly.
- Drop down and roll on the ground.

To inform any fire accident and call fire engine,
Dial **101**

What should not do?

If there is a burn in your skin,

- You shouldn't apply pen ink or coffee powder on it. (If you apply, it will infect the burn)
- Don't prick it with sharp things like needles. (If you prick it, it will infect the burn)

How **fire** is used in our daily life?
